Abstract

This research focuses on the design and validation of a questionnaire that intends to investigate young mothers' child rearing practices in the social psychology across cultures framework. This instrument would assist teachers primarily in the field of early childhood care and education in creating more culturally responsive institutional care services. Questions about the regularity of young mothers' actions with regards to particular child rearing practices were asked in the questionnaire. The questionnaire was designed to measure five constructs: a. autonomy, b. separateness, c. conformity, d. relatedness, and e. attachment. The first four constructs relate to the individualism-collectivism framework and the fifth to John Bowlby's attachment theory. A pilot test among (n=34) young Cape Coloured mothers in South Africa, between the ages of 18 and 35 was conducted and resulted in four of the five scales being validated. The findings show that the cultural complexities of childrearing practices within this group of people however calls for further research.
# Contents Table

1. Introduction 6
  1.1. Introduction 6
  1.2. Benefits of early childcare and education 7
  1.3. Early Childcare and Education in South Africa 8
  1.4. What quality ECCE entails 10
  1.5. Rationale of the study 11
  1.6. The study population 12
  1.7. Benefits and Significance 13
  1.8. Chapter outline 14
  1.9. Key Concepts
     1.9.1. Designing an Instrument 14
     1.9.2. Young mothers 14
     1.9.3. Childrearing practices 15

2. Theoretical Framework and Methodology 16
  2.1. Introduction 16
  2.2. Relevant childrearing practices 16
  2.3. Cultural orientations 18
  2.4. Social psychology across cultures framework 19
  2.5. Instrument reliability and validation 21
  2.6. Ethical considerations 25
  2.7. Demographics 26

3. The instrument: constructs and survey questions 27
  3.1. Introduction 27
  3.2. The instrument
     3.2.1. Background 27
     3.2.2. Compiling Measures 31
        3.2.2.1. Individualism 31
           3.2.2.1.1. Autonomy 32
           3.2.2.1.2. Separateness 32
        3.2.2.2. Collectivism 33
           3.2.2.2.1. Conformity 34
           3.2.2.2.2. Relatedness 35
     3.2.3. Attachment 36
  3.3. Conclusion 38

4. Data analysis and findings 39
  4.1. Introduction 39
  4.2. Interview Participants 39
  4.3. Results from the interviews 39
  4.4. Other qualitative findings 41
  4.5. Questionnaire respondents 42
  4.6. Participation and consent 43
  4.7. Description of the data 43
4.8. Validation of the instrument 48
  4.8.1. Internal scale reliabilities 48
  4.8.2. Construct validity 50
    4.8.2.1. Scale items 50
    4.8.2.2. Factor analysis – Exploring factors 50
    4.8.2.3. Confirming Factors 52
  4.9. Influences on scale 53
  4.10. Open ended questions 56
  4.11. Summary 57

5. Further considerations and recommendations 58
  5.1. Introduction 58
  5.2. Discussion of noteworthy findings 58
  5.3. Suggestions for further research 61
  5.4. Limitations to the study 63
  5.5. Notes and recommendations 66
  5.6. Conclusion 66
